

Golam Mostofa

Senior Software Engineer | ERP Architect | Full-Stack Developer

Address: House No. 45/1, Cant. Area, Rangpur Sadar, Rangpur 5400 | **Mobile:** +8801723695251

E-mail: golam.mostofa58@gmail.com | mostofa.cse.pust@yahoo.com

GitHub: github.com/mostofacse58 | **LinkedIn:** linkedin.com/in/golammmostofa58 | **Portfolio:** mostofacse58.github.io/mostofacse58

CAREER OBJECTIVE

To take a Senior Software Engineer, ERP Architect or Technical Lead role in an organisation building systems that people depend on every shift. Over eleven years I have specialised in turning fragmented factory operations into synchronised digital ecosystems — HRMS, payroll, production, finance and costing — and I want to keep doing that work at a larger scale, bringing an established .NET and SQL Server foundation together with modern Laravel, Next.js and cloud-native delivery.

ACADEMIC QUALIFICATION

- B.Sc. in Computer Science & Engineering from **Pabna University of Science & Technology**, 2010 to 2013, with CGPA 3.53 out of 4.00.
- HSC in Science from **Shah Abdur Rouf College**, 2006 to 2008, with GPA 3.90 out of 5.00.
- SSC in Science from **Shalti Samas Dighi Adarsha High School**, 2000 to 2006, with GPA 4.50 out of 5.00.

TECHNICAL SKILLS

Languages	C# T-SQL PHP JavaScript (ES6+) TypeScript C / C++ Java
Backend	ASP.NET Core / Web API Dapper ORM REST API design PHP Laravel CodeIgniter Entity Framework Core Node.js / Express.js
Frontend	HTML5 & CSS3 Bootstrap jQuery & AJAX Next.js (App Router) React Tailwind CSS Vue.js
Databases	MS SQL Server Stored procedures & tuning MySQL Schema design & indexing PostgreSQL MongoDB Oracle
ERP Platforms	HRMS & Payroll Production & MES Inventory & Assets Finance & Costing Epicor Kinetic BAQ / BPM customisation
Reporting & BI	SSRS / RDLC EPPlus (Excel) Power BI iTextSharp (PDF) Apache ECharts
Architecture	ERP architecture & design Enterprise data migration API-first design N-Tier / layered design Multi-tenant SaaS
Tools & Platforms	Visual Studio & VS Code SQL Server Management Studio Git & GitHub Postman Vercel Docker

TRAINING & CERTIFICATIONS

- AI Agent Mastery: Build, Automate & Scale** | Hablu Programmer
Technologies: n8n, Langflow, LangChain, Claude AI, RAG systems, Multi-agent orchestration, Voice-enabled agents, Zapier, Make.com, CRM & e-commerce automation, Agent deployment & hosting.
Duration: 2026 — 6 months (In Progress) · Online
- AI Powered Complete Web Development** | Programming Hero
Technologies: HTML, CSS, Responsive design, JavaScript (ES6), DOM, React, Context API, React Router, Next.js, Node.js,

Express, MongoDB, JWT auth, REST APIs, Git & GitHub.

Duration: 2026 — 6 months · Banani, Dhaka

3. **Next Level AI-Driven Software Engineering Bootcamp** | Programming Hero

Duration: 2026 — 6 months · Banani, Dhaka

4. **Full Stack ASP.NET Core MVC Web Development** | Dev Skill

Technologies: C#, ASP.NET Core MVC, Razor, Dependency injection, SQL, Entity Framework, AutoMapper, Identity & security, Web API, Angular, Docker, AWS, Testing, Git.

Duration: 2025 — 6 months · Mirpur-10, Dhaka

5. **Android Mobile Application Development** | BASIS Institute of Technology & Management (BITM)

Duration: 6 months · Dhaka

EMPLOYMENT HISTORY

Employment History (1): Sr. Software Engineer

Jun 2021 — Running (5 yr. 3 month)

Constant Ads, Austria (remote)

- Developed back-end programming and application logic in PHP using both Laravel and CodeIgniter across internal and client-facing products.
- Shaped the Laravel project structure and set the conventions the rest of the team builds against, advising on best practice and project approach.
- Ran code reviews and shared implementation approaches with other developers to keep the codebase consistent as the team grew.
- Built and maintained front-end behaviour with JavaScript, jQuery, AJAX, React.js, Vue.js and Bootstrap against the same back-end services.
- Worked within team circles on both internal platforms and external client delivery, taking features from requirement through to release.

Projects Contributed: Laravel | CodeIgniter | Vue.js | React.js | REST API | jQuery & AJAX | Bootstrap

Employment History (2): Sr. Officer — Software & ERP,
Department of IT

Apr 2021 — Running (5 yr. 4 month)

Ventura Leatherware Mfy (BD) Ltd. (Uttara EPZ, Rangpur, Bangladesh)

- Led full-cycle ERP development and architecture across the leather manufacturing operation, from requirement analysis to production rollout.
- Delivered the Epicor Kinetic ERP implementation — module setup, BAQ/BPM customisation, data migration and user training.
- Architected and delivered an 18-module custom ERP suite covering inventory, production, HRMS, payroll, finance and costing, all live in production.
- Built the MaatDrive SaaS platform serving trade, crafts and service companies in the German market, on Laravel and Next.js.
- Designed the RESTful API layer shared across the web systems and the Android applications used on the factory floor.
- Engineered relational schemas and stored procedures on SQL Server and MySQL, with indexing and query tuning for high-volume production data.
- Produced the reporting layer management runs on — SSRS/RDLC, Power BI and Apache ECharts, with automated Excel and PDF generation via EPPlus and iTextSharp.
- Delivered on-site and remote support across ERP rollout, user training and ongoing system maintenance.

Projects Contributed: Epicor ERP | Custom ERP Suite (18 modules) | MaatDrive SaaS | VLM Core Dashboard | MDM Platform | VOS Apps | Paper Free Automation | Biometric ESS Kiosk | Canteen Booking

Employment History (3): Officer — Software Development

Jul 2017 — Apr 2021 (3 yr. 8 month)

Ventura Leatherware Mfy (BD) Ltd. (Nilphamari, Bangladesh)

- Carried out data analysis, database design, coding and development across the plant systems.
- Provided day-to-day database support on Microsoft SQL Server and MySQL, including backup, recovery and performance work.
- Built the reporting layer the management team ran on, including Power BI analysis of production and cost data.
- Developed and maintained PHP (OOP) applications supporting factory operations.

Projects Contributed: Production Reporting | Power BI Analysis | Database Design | PHP (OOP) Applications

Employment History (4): Programmer

Jan 2015 — Jun 2017 (2 yr. 6 month)

Promiti Computer and Networks (Dhanmondi, Dhaka)

- Performed analysis, design, database design, coding and development as database engineer and programmer.
- Delivered software implementation for client sites, including installation, data setup and end-user training.
- Built and maintained web and website development work alongside the core database engineering role.

Projects Contributed: Database Engineering | Software Implementation | Web Development

KEY PROJECTS

VLM Core — ERP Production Dashboard | *Architect & Lead Developer*

A cross-platform Electron desktop application monitoring production in real time across multiple factory workshops, fed simultaneously by a live Excel file-watcher and MSSQL stored procedures behind one typed IPC bridge.

- Live Excel file-watching via Chokidar
- MSSQL stored-procedure integration behind a unified typed IPC interface
- Eight interactive visualisations — efficiency, capacity, overtime, production trees
- Hierarchical production tree navigation
- Light/dark theme with persistent storage and CSS-variable chart styling
- Collapsible sidebar with React Router v7 multi-level navigation
- Lazy-loaded pages — sub-two-second startup

Tech Stack: Electron 41 | React 19 | Vite 8 | React Router v7 | TypeScript | Recharts | Apache ECharts | Tailwind CSS v4 | DaisyUI | Chokidar | MS SQL Server | ExcelJS

MDM — Android Device Management Platform | *Architect & Lead Developer*

A full-stack enterprise Mobile Device Management platform — a Kotlin Device Owner agent, a Node.js control server and a Next.js admin console — giving zero-touch enrolment, policy enforcement and live device telemetry from one dashboard.

- Device Owner provisioning — QR and zero-touch enrolment
- Kiosk and lock-task mode with app whitelisting and blacklisting
- Uninstall protection, factory-reset, USB and settings restrictions
- Remote lock, unlock, reboot and wipe over a persistent command channel
- Silent app install, update and configuration push
- Device grouping with live online/offline status
- Battery and storage telemetry, policy templates

Tech Stack: Kotlin | Android Device Owner API | Node.js 20 | Express.js | TypeScript (strict) | Next.js | Kysely | MySQL 8 | Zod | Pino | REST API | WebSocket | Kiosk / lock-task mode | JWT auth | Playwright | Vitest

Biometric Authentication & ESS Kiosk | *Architect & Lead Developer*

A centralised biometric authentication platform wired into the existing ESS system — an employee puts a finger on the reader at a shared kiosk and lands in their own self-service session, which disappears again the moment they walk away.

- Fingerprint and face recognition authentication across multiple devices
- Guided biometric enrolment workflow with per-employee device mapping
- Touch-friendly React kiosk with configurable session timeout and token cleanup
- ESS services at the kiosk — profile, attendance, leave balance, history, applications
- JWT auth with role and permission policies for Admin, HR, Kiosk Admin and Employee
- Device management — connection test, employee, biometric and attendance sync
- Real-time device monitoring: online/offline, last sync, failed authentication counts

Tech Stack: ASP.NET Core Web API | C# | Entity Framework Core | SQL Server | React | Axios | JWT authentication | SignalR | Hosted background services | Fingerprint & face recognition device SDK | Stored procedures & reporting views

VOS Apps — Unified Employee Super-App | *Architect & Lead Developer*

A single centralised Android platform delivering 11+ enterprise services over the company intranet — one app replacing the scattered systems the whole workforce used to juggle.

- Employee Self-Service (ESS)
- EK Click
- Automation
- VOS Operations
- VLMBD
- Meal Booking
- Asset Management and Asset History

Tech Stack: Android SDK | Java | REST API integration | Intranet-secured architecture | Role-based access control | Push notifications | Workflow & approval engine | SQL Server

Custom ERP Suite — 18 Modules | *ERP Architect & Lead Developer*

A complete in-house ERP suite built across manufacturing and government sectors — 18 modules covering inventory, production, finance, audit and administration, all delivered and live.

- Inventory
- Assets
- Accounts
- TPM (Total Productive Maintenance)
- MES (Manufacturing Execution System)
- Production
- Internal Audit

Tech Stack: ASP.NET Core | C# | Dapper ORM | SQL Server | PHP Laravel | Bootstrap | SSRS | EPPlus | iTextSharp

Epicor Kinetic ERP — Implementation Lead | *Implementation Lead*

Led the full enterprise implementation of Epicor Kinetic ERP in a manufacturing company — customization, module setup, data migration and user training.

- BAQ and BPM customization
- Production module setup
- Financial management configuration
- Supply chain management (SCM)
- Enterprise data migration
- End-user training

Tech Stack: Epicor Kinetic ERP | BAQ (Business Activity Queries) | BPM (Business Process Management) | SQL Server | Data migration | Financial Management | Supply Chain Management

MaatDrive — Business Management SaaS | *Architect & Lead Developer*

A cloud-based business management SaaS platform built for trade, crafts and service companies serving the German market.

- Customer Management
- Inventory
- Invoicing
- Project Management
- Accounting Preparation
- Time Tracking

Tech Stack: PHP Laravel | Next.js | React | MySQL | Bootstrap | Tailwind CSS | REST API | Multi-tenant SaaS

Hadi Real Estate ERP — Land & Plot Management | *Architect & Lead Developer*

A web-based ERP built specifically for land development companies — projects, plots, bookings, instalments, land registration, landowners, accounts, HR and a customer portal, in English and বাংলা, across more than twenty modules.

- Projects, plots, blocks, road and area with a Mouza & Dag master
- Live plot inventory — sold, available, reserved, free
- Customer bookings, agreements and down payments
- Flexible instalments — monthly, two-monthly, quarterly, half-yearly, yearly
- Auto due schedules, collection tracking and overdue alerts
- Land registration by Mouza / Dag / CS / RS / City
- Live land ledger — original versus registered versus available balance

Tech Stack: PHP Laravel | MySQL | Blade | Bootstrap | jQuery & AJAX | REST API | Chart.js | DataTables | Bengali PDF generation | SMS & email gateway integration | Role-based access control | Cloud hosting

Hadi Real Estate ERP — Building & Property Management | *Architect & Lead Developer*

The property-side counterpart on the same ERP platform — projects broken into buildings, floors and units, sold on flexible instalment plans, with construction progress, contractor billing and hand-over tracked alongside the sale.

- Project, building, floor and unit hierarchy
- Unit register with size, type, facing and pricing
- Live unit inventory — sold, available, reserved
- Bookings, agreements and flexible instalment schedules
- Collection posting with due and overdue tracking
- Construction milestone and work-progress recording
- Contractor and subcontractor billing

Tech Stack: PHP Laravel | MySQL | Blade | Bootstrap | jQuery & AJAX | REST API | Chart.js | DataTables | Bengali PDF generation | SMS & email gateway integration | Role-based access control | Cloud hosting

Paper Free Automation | *Architect & Lead Developer*

The paperless side of the factory: requisitions, requests, approvals and registers built as digital forms with configurable routing, so a document moves through the organisation on its own instead of being carried between desks.

- Digital forms replacing paper requisitions, requests and registers
- Configurable approval routing by role and department
- Multi-level approvals with delegation and out-of-office handling
- Rejection with reason routed back to the originator
- File and document attachments on any form
- Live status tracking and full approval history per document
- Email and push notification on pending, approved and rejected actions

Tech Stack: ASP.NET Core Web API | C# | Entity Framework Core | Dapper ORM | MS SQL Server | Bootstrap | jQuery & AJAX | REST API | Configurable workflow engine | PDF generation | Email & push notification hooks

Canteen Meal Booking System | *Architect & Lead Developer*

An employee canteen management and meal booking platform — staff book lunch and dinner ahead of the deadline, the kitchen sees the real count in the morning, and the food that used to be cooked on a guess stops going in the bin.

- Three roles — Admin, Employee and Canteen Staff — with policy-based authorisation
- Calendar booking interface with live lunch and dinner availability
- Configurable booking rules — deadlines, advance days, quantity caps, meal toggles
- Daily menu management: main dish, sides, vegetable, dessert, beverage and notes
- Booking statuses — booked, cancelled, served, not served, expired
- Canteen staff operation panel with AJAX serve-marking and searchable booking list
- Holiday management — public, company, weekly and special working days

Tech Stack: PHP Laravel | Laravel MVC | Blade components | Eloquent ORM | MySQL | Bootstrap | jQuery & AJAX | Chart.js | DataTables | SweetAlert | Select2 | Laravel policies & middleware

Restaurant POS — Point of Sale & Management | *Architect & Lead Developer*

A restaurant point of sale and management system — table plan and dine-in service, kitchen order tickets, split and merge billing, recipe-driven stock deduction, and the Z-report the manager closes the shift on.

- Floor plan and table management for dine-in service
- Fast order screen with offline-first capture and automatic sync
- Category-based kitchen order tickets to multiple kitchens
- Split and merge billing across tables and parties
- QR code self-ordering from the table
- Online ordering and table reservation
- Waiter-side ordering on a handheld

Tech Stack: PHP Laravel | MySQL | Blade | Bootstrap | jQuery & AJAX | Offline-first sync | Thermal & KOT printing | QR code ordering | Payment gateway integration | Chart.js | DataTables | Role-based access control

Inventory Management | *Developer*

The inventory and store-control module of the custom ERP suite, built for manufacturing and government operations.

- Item master with categories, units of measure and multi-store locations
- Goods receipt against purchase order, with inspection and rejection
- Issue, inter-store transfer and return with approval
- Batch and lot tracking where the material demands it
- Physical stock count and adjustment with an approval trail
- Re-order level alerts and stock ageing
- Stock valuation and a running ledger per item

Tech Stack: ASP.NET Core | C# | Dapper ORM | SQL Server | PHP Laravel | Bootstrap | SSRS | EPPlus | iTextSharp

HRMS & Payroll System | *Developer*

The HRMS and Payroll module of the custom ERP suite — one of the core systems I have built and maintained across the manufacturing sector.

- Employee master with department, designation, grade and posting history
- Device-based attendance capture with shift and roster handling
- Leave types, entitlement, application and multi-level approval
- Overtime capture and approval against production shifts
- Monthly payroll with earnings, deductions and arrears
- Provident fund, tax, loan and advance handling
- Payslip generation and bank disbursement file output

Tech Stack: ASP.NET Core | C# | Dapper ORM | SQL Server | PHP Laravel | Bootstrap | SSRS | EPPlus | iTextSharp

Production MES Module | *Developer*

The Manufacturing Execution System module of the custom ERP suite, covering production on the factory floor.

- Production orders and routing against work centres
- Line-wise and workshop-wise output capture per shift
- Plan versus actual efficiency tracking
- Downtime and stoppage logging with reason codes
- Rejection and rework capture against defect reasons
- Work-in-progress tracking between process stages
- Operator and line productivity reporting

Tech Stack: ASP.NET Core | C# | Dapper ORM | SQL Server | PHP Laravel | Bootstrap | SSRS | EPPlus | iTextSharp

ADDITIONAL PROJECTS

GTechSoft — Software Venture	Laravel Next.js ASP.NET Core MySQL
Barbershop Management — Web	Laravel MySQL Bootstrap jQuery
Barbershop Booking — Mobile App	Android SDK Java REST API MySQL
Accounts & Finance Module	ASP.NET Core C# SQL Server iTextSharp
Gate Pass System	PHP Laravel MySQL Bootstrap REST API
eSignature System	PHP Laravel MySQL Bootstrap iTextSharp

KEY PROFICIENCIES

- ERP Architecture & Design
 - Enterprise Data Migration
 - Reporting & Documentation
 - Technical Solution Design
 - Database Engineering
- Team Lead & Monitoring
 - Project Management
 - Stakeholder Communication
 - User Training & Rollout
 - Maintenance & Support

OTHER SKILLS

Languages	Bangla (native — reading, writing and speaking high) English (reading and writing high, speaking medium)
Soft Skills	Analytical thinking and planning Strong verbal and written communication skills Accuracy and attention to detail Organisation and prioritisation skills Problem analysis, use of judgment and the ability to solve problems efficiently
Domains	Government Textile Leather Manufacturing Energy Real Estate SaaS

EXTRA CURRICULAR ACTIVITIES

- Analytical thinking and planning.
- Strong verbal and written communication skills.
- Accuracy and attention to detail.
- Organisation and prioritisation skills.
- Problem analysis, use of judgment and the ability to solve problems efficiently.
